The Manufacturers' Handbook Series

1. THE BRITISH COLUMBIA TRADE INDEX, 1945 EDITION.

An up-to-date, comprehensive list of the products manufactured in British Columbia. The products are listed alphabetically, together with the name and address of the manufacturers.

2. BRITISH COLUMBIA AS A MARKET.

This booklet has been designed to assist producers and distributers who may be interested in appraising the Province of British Columbia as a market for their products. It has been constructed in such a way that both those who already possess an intimate knowledge of the Province, and those who are less well acquainted with the region, will be able to form reasonable judgments about such questions as:—

How many customers are there in British Columbia?
Where do they live?
What are their characteristics?

(Expected publication date, January, 1947.)

3. BRITISH COLUMBIA AS A SITE FOR MANUFACTURING.

(In preparation.)

PREFACE.

In this report the Bureau of Economics and Statistics presents detailed and summary statistics of the external trade of British Columbia for the calendar years 1939–1944.

As a result of an arrangement concluded in 1938, the Bureau of Economics and Statistics has received from the Dominion Bureau of Statistics, External Trade Branch, since January 1st, 1939, a monthly detailed statement of all imports and exports passing through British Columbia Customs ports. However, since the outbreak of war, at the request of the Dominion Bureau of Statistics, the Bureau of Economics and Statistics suspended publication of the regular annual report on the trade of British Columbia. The present report, the first since 1939, will originate a new series, supplying statistics of the external trade of British Columbia. For the year 1945 and succeeding years, this Bureau will resume publication of the annual report on the external trade of British Columbia.

Since release of the Trade Report of 1939 certain adjustments have been made in the trade statistics, based on new or improved data. The revised figures contained in this report should be used in preference to figures published earlier.

In accordance with the "War Measures Act," gold shipments have been excluded from all tables in this report. Similarly, products of foreign origin (non-Canadian) exported through British Columbia ports have been excluded; the value of the omitted foreign products was as follows:—

VALUE OF ALL FOREIGN PRODUCE EXPORTED THROUGH BRITISH COLUMBIA CUSTOMS PORTS, 1939–1944.

Year.	Amount.	Year.	Amount.
1939	$1,162,585	1942	$508,885
1940	985,327	1943	3,229,398
1941	1,002,872	1944	2,635,002

With most of the overseas trade routes exposed to enemy action, the foreign trade of British Columbia has changed, both in character and direction since 1939. A few of the broad aspects of the changes between 1939 and 1944, are noted below:—

There has been a noticeable increase in trade, both exports and imports. The value of British Columbia products exported rose from $112,578,073, in 1939, to a high of $223,735,599, in 1942; falling off, however, to $179,363,355 in 1944. Most of this increase has been reported under the heading of miscellaneous products, which includes such exports as ships and war materials. The value of imports rose from $61,922,110, in 1939, to a high of $122,005,147, in 1944. The principal increases were recorded in the miscellaneous products and in the iron group.

Changes also occurred in the direction of British Columbia's foreign trade between 1939 and 1944. Exports of British Columbia products to the United States rose from $37,968,762, in 1939, to a high of $167,484,574 in 1942; falling off to $107,498,262 in 1944: while imports from the United States rose from $35,709,929, in 1939, to a high of $95,756,329 in 1943; falling off slightly, in 1944, to $95,311,231.

Displaced by the United States in 1942 as British Columbia's leading export market, the United Kingdom purchased British Columbia products valued at $53,220,-937, in 1943 ($45,463,306 in 1944), compared with $43,480,392 in 1939: while imports from the United Kingdom declined from $10,575,617, in 1939, to a low of $5,816,773 in 1942; subsequently rising to $6,525,729 in 1944.

In 1939 the eight principal markets for British Columbia exports were: United Kingdom ($43,480,392), United States ($37,968,762), Australia ($8,517,922), Japan

($8,396,891), British South Africa ($2,385,634), Hawaii ($1,548,717), China ($1,099-948), and New Zealand ($932,243). In 1944 the order of the eight leading export markets had become: United States ($107,498,262), United Kingdom ($45,463,306), Australia ($6,905,615), Russia ($5,487,959), British South Africa ($3,157,534), British India ($2,944,309), New Zealand ($2,241,640), and Hawaii ($1,782,712).

In 1939 the eight leading sources of supply for British Columbia importers were: United States ($35,709,929), United Kingdom ($10,575,617), Fiji ($2,777,401), British India ($2,271,833), Japan ($1,696,229), Australia ($1,426,755), China ($837,194), and Hong Kong ($645,391). By 1944 this order had become: United States ($95,311,231), United Kingdom ($6,525,729), Fiji ($3,627,732), British India ($2,502,724), Columbia ($2,295,367), New Zealand ($2,260,864), Australia ($2,019,088), and Salvador ($915,474).

EXPLANATORY NOTES.

1. In all the tables of imports and exports in this report, the quantities and values are based upon the declarations of importers (import entries) and of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods; that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this report are trade items such as "Washing-machines and parts" and "Internal-combustion engines and parts," etc., which show both quantities and values. In the item "Washing-machines and parts" the quantity represents the number of "Complete washing-machines" only, while the value represents not only the value of the specified number of complete washing-machines but also the value of all kinds of "Parts" of washing-machines; therefore, in this item, and in similar items, the average value per unit can not be ascertained.

5. Under the main provisions of the law, the value of merchandise imported into British Columbia is the fair market value or price thereof when sold for home consumption in the principal markets of the country from which, and at the same time when, said merchandise was exported directly to British Columbia; but the value shall not be less than the price to jobbers and wholesalers generally, nor less than the actual cost of production at the time of shipment plus a reasonable advance for cost of selling, and profit. (*See* sections 35 to 45 of the "Customs Act.")

6. For Customs entry purposes, the value of the imports, which is in the currency of the country from which goods are imported, is converted to Canadian dollars at authorized exchange ratios. (*See* section 55 of the "Customs Act" and Orders in Council respecting currency valuations.)

7. "Exports through British Columbia ports" include not only articles of purely British Columbia and Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in British Columbia and Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

8. The value of "Exports through British Columbia ports" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling, and other charges.

9. Imports into British Columbia are classified as received from the countries whence they were consigned to British Columbia. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transhipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to British Columbia. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; British Columbia statistics record such imports as coming from the United Kingdom.

10. Exports from British Columbia are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods exported from British Columbia are intended

to pass, without interruption of transit, except in the course of transhipment or transfer from one means of conveyance to another.

11. The initials " N.O.P." mean " not otherwise provided for."

Tables 1, 2, 3, 7, 8, 9, 11, 12, 13, 14, 16, 17, 18, and 19 show the merchandise that was imported or exported through British Columbia Customs ports; but this does not imply that goods so imported were necessarily for consumption in British Columbia, neither does it imply that goods exported through British Columbia Customs ports necessarily originated in British Columbia.

In the case of exports, certain products have been marked " B.C."; the products so marked are considered to be of British Columbia origin. However, certain of these " B.C." products are also exported through ports in other provinces of Canada; Tables 10 (1939–42) and 15 (1943–44) show the estimated exports of these products of British Columbia through all Canadian Customs ports. In order to obtain a total representing the exports of British Columbia products through all Customs ports in Canada, it would be necessary to substitute in Tables 11 and 12 (1939–42), or Tables 16 and 17 (1943–44), those " B.C." products shown in Table 10 (1939–42), or Table 15 (1943–44), for the respective years; this has been done in Tables 4, 5, and 6.
